Ayer's Cathartic Pills

THE sciences of Chemistry and Medicine have been taxed their number to produce this best, most perfect purgative which is known to man. Innumerable proofs are shown that these Prus have virtues which surpass in excellence the ordinary medicines, and that they win unprecedentedly upon the esteem of all men. They are safe and pleasant to take, but powerful to cure. Their penetrating properties atimulate the vital activities of the body, remove the elastructions of its organs, purify the blood, and expel disease. They purge out the foul humers which breed and grow distemper, stimulate aluggish or disordered organs into their natural action, and impart healthy tons with strength to the whole system. Not only do they care the every-day complaints of every body, but also formidable and dangerous diseases that have buffed the best of human skill. While they produce powerful affects, they are at the same time, in diminished down, the rafest and best physic that can be employed for children. Being angar-coated, they are pleasant to take; and being purely vegetable, are free from any risk of harm. Curse have been made which surpass belief were they not substantiated by men of such exaited position and character as to forbid the suspicion of untruth. Many eminent clergymen and physicians have lest their names to certify to the public the reliability of my remedies, while others have sent me the assurance of their conviction that my Preparations contribute immensely to the relief of my
